Virtual Curriculum Cluster

Virtual Curriculum 2023-2024

	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2									
Yr. 7	E-safety, Security and Digital Footprints 	Understanding Computers – Computer Systems 	How data is represented in computers – Intro to Languages <table border="1" data-bbox="898 410 1146 588"><thead><tr><th>Binary Digit (Bit)</th><th>Electronic Charge</th><th>Electronic System</th></tr></thead><tbody><tr><td>1</td><td>●</td><td>ON</td></tr><tr><td>0</td><td>●</td><td>OFF</td></tr></tbody></table>	Binary Digit (Bit)	Electronic Charge	Electronic System	1	●	ON	0	●	OFF	Programming (Block based - Scratch) 	Digital Creativity – Animations 	Collaborative Project – Planning A School Trip 
	Binary Digit (Bit)	Electronic Charge	Electronic System												
1	●	ON													
0	●	OFF													
<p>Students are able to:</p> <ul style="list-style-type: none">Understand that they can go to exciting places online, but they need to follow certain rules to remain safe.Understand that they should stay safe online by choosing websites that are good for them to visit, and avoid sites that are not appropriate for them.Explore reasons why people use passwords, learn the benefits of using passwords, and discover strategies for creating and keeping strong, secure passwords.Explore what it means to be responsible to and respectful of their offline and online communities as a way to learn how to be good digital citizens.	<p>Students are able to:</p> <ul style="list-style-type: none">Explain the function of the main internal parts of basic computer architecture.Understand the hardware and software components that make up computer systems, and how they communicate with one another and with other systems.Understand the function and purpose of a computer.Understand that not every computer looks like a PC and that many everyday devices contain computers.Describe the computer system (Input – Process – Output).To be able to describe the hardware components found in a computer.Describe how calculations are performed by the CPU.Classify a range of software including operating systems, utility and application software. Explains the difference between hardware and software, and their roles within a computer system.	<p>Students are able to:</p> <ul style="list-style-type: none">Understand how data is stored in computers using BinaryConvert positive denary whole numbers into binary numbersConvert binary numbers to denary.Explain what binary digits (bits) are, in terms of familiar symbols such as digits or lettersMeasure the size or length of a sequence of bits as the number of binary digits that it contains.Describe how natural numbers are represented as sequences of binary digits	<p>Students are able to:</p> <ul style="list-style-type: none">Use logical reasoning to predict the behaviour of programs.Builds programs that implement algorithms to achieve given goals.Demonstrates how arithmetic operators, if statements, and loops, are used within programs. Declares and assigns variables.Apply decomposition to break down a large problem into more manageable steps.Use user input in a block-based programming language.Use a block-based programming language to create a sequence.Use variables in a block-based programming language.	<p>Students are able to:</p> <ul style="list-style-type: none">Create a 3–10 second animationAdd, move, and delete keyframes to make basic animationsPlay, pause, and move through the animation using the timelineRender the animation and present it to an audience.	<p>Students are able to:</p> <ul style="list-style-type: none">Combine Information technology and the wider life around school to research, plan and implement a project and then complete peer and self-evaluations.Working as part of a team for this project so will allow them to practise teamwork and leadership skills and also their creativity.										

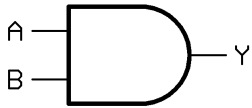

Virtual Curriculum 2023-2024

		<ul style="list-style-type: none"> Describe systems software and application software. Identify the different application software on the school network. Describe the different types of secondary storage. Can give examples of how data is stored on a computer. 				
Yr. 8	E-safety, Security and Ethics  <p>Students are able to:</p> <ul style="list-style-type: none"> Recognise the 24/7, social nature of digital media and technologies, and gain basic vocabulary and knowledge for discussing the media landscape. Review their media habits and the array of media they use on a weekly basis, and reflect on the role of digital media in their lives. Recognise that they have a digital footprint and that this information can be searched, copied and passed on, but that they can take some control based on what they post online. Consider test their knowledge of digital media and talk about the role media plays in their lives. 	Understanding Computers – Hardware & Software  <p>Students are able to:</p> <ul style="list-style-type: none"> Describe the computer system (Input – Process – Output). To be able to describe the hardware components found in a computer. To be able to describe the different types of secondary storage. To be able to describe systems software and application software. To be able to identify the different application software on the school network. 	How data is represented in computers – Languages and Programming  <p>Students are able to:</p> <ul style="list-style-type: none"> Use a basic computer language and investigate making digital media such as images and sounds, and discover how media is stored as binary code. They will draw on familiar examples of composing images out of individual elements, mix elementary colours to produce new ones, take samples of analogue signals to illustrate these ideas. This will help the students to understand how the underlying principles of digital representations are applied in real settings. 	Programming – Intro to Python  <p>Students are able to:</p> <ul style="list-style-type: none"> Describe what algorithms and programs are and how they differ Recall that a program written in a programming language needs to be translated in order to be executed by a machine Write simple Python programs that display messages, assign values to variables, and receive keyboard input Locate and correct common syntax errors 	Digital Creativity – Image Manipulation & Editing  <p>Students are able to:</p> <ul style="list-style-type: none"> Draw basic shapes (rectangle, ellipse, polygon, star) with different properties (fill and stroke, shape-specific attributes) Manipulate individual objects (select, move, resize, rotate, duplicate, flip, z-order) Manipulate groups of objects (select, group/ungroup, align, distribute) 	Collaborative Project – App Lab  <p>Students are able to:</p> <ul style="list-style-type: none"> Identify when a problem needs to be broken down Implement and customise GUI elements to meet the needs of the user Recognise that events can control the flow of a program Use user input in an event-driven programming environment Use variables in an event-driven programming environment Develop a partially complete application to include additional functionality Identify and fix common coding errors Pass the value of a variable into an object Establish user needs when completing a creative project Apply decomposition to break down a large

Virtual Curriculum 2023-2024

	<ul style="list-style-type: none"> • Discuss their understanding of ethical behaviour and are introduced to the concept of online ethics. • Explore how they and others represent themselves online and the relationship between online and offline selves. 					<p>problem into more manageable steps</p> <ul style="list-style-type: none"> • Use user input in a block-based programming language • Use a block-based programming language to create a sequence • Use variables in a block-based programming language • Use a block-based programming language to include sequencing and selection • Use user input in a block-based programming language • Use variables in a block-based programming language • Reflect and react to user feedback • Use a block-based programming language to include sequencing and selection • Use user input in a block-based programming language • Use variables in a block-based programming language • Evaluate the success of the programming project
--	---	--	--	--	--	---

Virtual Curriculum 2023-2024

Yr. 9	Computer Systems - Understanding Computers  <p>Students are able to:</p> <ul style="list-style-type: none"> Describe the computer system (Input – Process – Output). To be able to describe the hardware components found in a computer. Describe how calculations are performed in CPU. Carry out calculations in CPU. To be able to describe systems software and application software. To be able to identify the different application software on the school network. To be able to describe the different types of secondary storage. 	Representation of Data (Binary & Beyond)  <p>Students are able to:</p> <ul style="list-style-type: none"> Develop an understanding how data is represented in a computer Convert denary numbers and characters into binary numbers <p>Knowledge</p> <ul style="list-style-type: none"> Students will know that computers represent data as binary Students will know how to convert denary numbers and characters to binary numbers <p>Skills</p> <ul style="list-style-type: none"> Be able to convert denary numbers and characters to binary numbers 	Binary: Logic Gates & Boolean  <p>Students are able to:</p> <ul style="list-style-type: none"> Develop an understanding of what an algorithm is Represent an algorithm as a flowchart Develop an understanding of different types of algorithms Demonstrate an understanding of binary numbers and algorithms <p>Knowledge</p> <ul style="list-style-type: none"> Students will know what an algorithm is Students will be able to identify different types of algorithm <p>Skills</p> <ul style="list-style-type: none"> Be able to design an algorithm, using a flowchart 	Programming: Python – Programming Skills  <p>Students are able to:</p> <ul style="list-style-type: none"> Write programs that display messages, receive keyboard input, and use simple arithmetic expressions in assignment statements Use selection (if-elif-else statements) to control the flow of program execution Locate and correct common syntax errors Create lists and access individual list items 	Programming: Python – Advanced (Chatbot)  <p>Students are able to:</p> <ul style="list-style-type: none"> Use iteration (while statements) to control the flow of program execution. Perform common operations on lists or individual items. Perform common operations on strings or individual characters Use iteration (for statements) to iterate over list items. Perform common operations on lists or strings. Use iteration (for loops) to iterate over lists and strings Use variables to keep track of counts and sums Combine key programming language features to develop solutions to meaningful problems 	Collaborative Project – Planning a DofE Expedition  <p>Students are able to:</p> <ul style="list-style-type: none"> Prepare a printed report for their Duke of Edinburgh Bronze Award. They gather, process and output information in text and image form. Pupils work to complete different aspects of a report then join together to form a full report and then work to produce an itinerary and plan. They learn to develop strategies of group working including data sharing. There are a variety of opportunities for cross curricular links e.g. English, Geography (weather), etc.
--------------	--	--	---	---	---	---

Virtual Curriculum 2023-2024

Yr. 10	<p>Fast Food Project</p>  <p>Students are able to:</p> <ul style="list-style-type: none"> Identify, Interact with and use ICT systems to meet requirements of a straightforward task in a familiar context. Manage information storage by working with files and folders. Follow and demonstrate understanding of the need for safety and security practices. Use search techniques to locate and select relevant information. Select information from a variety of ICT sources for a straightforward task. Enter, develop and refine information using appropriate software to meet requirements of straightforward tasks. Use appropriate software to meet requirements of straightforward data-handling task. Use communications software to meet requirements of a straightforward task. Combine information within a publication for a familiar audience and purpose. Evaluate own use of ICT tools. 	<p>Combining & Presenting Information</p>  <p>Students are able to:</p> <ul style="list-style-type: none"> Understand the purpose of different document types Explain the purpose of different document types Know appropriate software to present and communicate information Describe the features of applications which make them suitable for presenting and communicating information Be able to produce appropriate documents for different audiences Produce documents that meets the needs of defined audiences Use tools and techniques to enhance the presentation of information Be able to review documents Carry out a document review 	<p>Using ICT to communicate (Word Processing)</p>  <p>Students are able to:</p> <ul style="list-style-type: none"> Learn to use the application to create new documents, and to add and edit content Use application tools to design a document's look-and-feel by manipulating page layout, fonts, styles and images Learn to create text structures that make content easier to read and understand, including tables, and bulleted and numbered lists Learn to collaborate on word-processing projects by editing and sharing documents 	<p>Using Spreadsheets</p>  <p>Students are able to:</p> <ul style="list-style-type: none"> Identify columns, rows, cells, and cell references in spreadsheet software Use formatting techniques in a spreadsheet Use basic formulas with cell references to perform calculations in a spreadsheet (+, -, *, /) Use the autofill tool to replicate cell data Explain the difference between data and information Explain the difference between primary and secondary sources of data 	<p>Collaborative Project</p> <p>TBD</p>
--------	--	--	---	---	---

Virtual Curriculum 2023-2024

Yr. 11	Managing Information - eSafety  <p>Students are able to:</p> <ul style="list-style-type: none"> Identify, Interact with and use ICT systems to meet requirements of a straightforward task in a familiar context. Manage information storage by working with files and folders. Follow and demonstrate understanding of the need for safety and security practices. Use search techniques to locate and select relevant information. Select information from a variety of ICT sources for a straightforward task. Enter, develop and refine information using appropriate software to meet requirements of straightforward tasks. Use appropriate software to meet requirements of straightforward data-handling task. Use communications software to meet requirements of a straightforward task. Combine information within a publication for a familiar audience and purpose. Evaluate own use of ICT tools. 	Finding and Selecting Information  <p>Students are able to:</p> <ul style="list-style-type: none"> Use equipment safely, e.g. arrange hardware, cables, adjust seating, lighting, avoid hazards, take breaks Select and use appropriate ICT-based information sources Recognise different sources of information, ICT-based and other forms Know how to use ICT-based information sources, e.g. Internet, apps, social media, USB, SD card, CD, DVD Use correct procedures to access, use and close application Search to find specific information Use input devices Use appropriate search techniques, e.g. search, menu, contents list, index, key word, find tool Use internet sources of information, i.e. enter a web address, use search engine, follow links, use forward, back and use bookmarks Use Help facilities to find information within applications Use removable media 	Assessment Prep – Advanced Spreadsheets (Basic Formulas, IF Functions, Absolute function, Lookup formula) Advanced Spreadsheets  <ul style="list-style-type: none"> Collect data Analyse data Create appropriate charts in a spreadsheet Use the functions SUM, COUNTA, MAX, and MIN in a spreadsheet Analyse data Use a spreadsheet to sort and filter data Use the functions AVERAGE, COUNTIF, and IF in a spreadsheet Use conditional formatting in a spreadsheet 	Assessment Prep - Using ICT to communicate (Email)  <ul style="list-style-type: none"> Use equipment safely, e.g. arrange hardware, cables, adjust seating, lighting, avoid hazards, take breaks Access email application Keep information secure, e.g. password, PIN, keep copies safe Open mailbox Use input devices, e.g. keyboard, mouse Create and send an email message 3.1 Create an email message Enter an email address Enter an appropriate subject Enter text in the message area Check meaning, accuracy and suitability of the email Send an email Print an email Receive and read email messages Open an email that has been received Read the email Print the email Reply to an email Prepare a reply to the received email Use the reply facility Enter text in the message area 	Assessment Period	
---------------	---	--	--	--	--------------------------	--

Virtual Curriculum 2023-2024

		<ul style="list-style-type: none">• Insert, use and remove media safely, e.g. USB, SD card, CD, DVD, zip disc/driver, etc. 5 Select and present information• Recognise when appropriate information has been found• Know how to present information, e.g. printouts, written reports		<ul style="list-style-type: none">• Check meaning, accuracy and suitability of the email• Send the email• Print the email• Delete an email• Find the received email• Delete an email

Virtual Curriculum 2023-2024

Curriculum Opportunities

Term & Date	Event	Year Group	Aim
HT 1 – TBC	Ada Lovelace day	KS3 (7-9)	Highlight women in Computing / History – (Now & Then)
HT 2 – TBC	BIMA – Digital day	KS4 (10 & 11)	Introduce & insight in careers in digital world
HT 2 – Nov '23 (TBC)	Bebras Challenge	KS3 (8&9)	Introduce to Computational thinking - Welcome - UK Bebras
HT 3 - TBC	Bletchley Park Visit of Virtual learning	KS3 7 & 8	History of computing – Discover, explore & be inspired Alan Turing – LGBTQ+ - Stonewall
HT 4 - TBC	Barclays IT allowed day	KS3 8	Enrich girls & highlight how computing used within industry context
HT 4 & 5 Apr '24 (TBC)	Industry WOW DAY – insight & highlight into careers in the digital sector	KS3 8 & 9	<p>Insight & insight into careers in the industry:</p> <ul style="list-style-type: none"> • BIMA • InnovateHer • Briggs Automotive Company • <p>Work alongside CAS/NCCE & MGL</p> <p>Target half term before options to increase uptake at KS4</p>

- Target **innovateher** pupils (Year 9 15 pupils to uptake CS) - <https://innovateher.co.uk> - libby@innovateher.co.uk
- Pupil survey – **Opinions & thoughts of 'computing'**
 - Use the results in the design & development of resources of the KS3 curriculum
- Highlight careers within the industry using industry role models
 - National Centre for Computing Education Curriculum Updates
 - STEM Curriculum Updates via Gaynor Hudson
